

## Handweavers Guild of Boulder Annual Sale Item Code List

The Item Code consists of three or four digits. The first two digits are the **Item Classification Number** found in the following list. The third and, possibly, fourth digit of the Item Code is the **Techniques Used** found in the second list. For example, a woven jacket with hand knit waistband and cuffs is mostly woven. Therefore the code number should be 359. A coat with appliqué would be code 310.

### Item Classification Number List
